HILLSDALE LANDSCAPE COMPANY

Indianapolis, Indiana

CATALOGUE No. 7

AN INVITATION TO HILLSDALE

Those interested in Trees, Plants and beautiful Gardens are always cordially welcome at Hillsdale. Here at our nursery, we maintain one of the largest and most beautiful Rock and Rose Gardens in Indiana. Extensive ornamental shrubbery and evergreen plantings, and spacious perennial and rose gradens are all for the benefit of our friends and customers, helping them get new ideas for making their own gardens more completely beautiful and satisfying.

LOCATION

The office and nurseries are one-quarter mile south of Castleton and eight miles north-east of Indianapolis. To reach us by motor from Indianapolis, take the Fall Creek Parkway North Drive at the intersection of State Road 37 and Keystone. Proceed to Millersville. Continue on Parkway Drive one mile beyond the broadcasting towers of WFBM to the intersection with Shadeland Avenue, which is State Road 534. Our sign is on the corner. Turn left (north) on Road 534 and continue two and one half miles to the Nurseries.

A second route is to drive out on the Noblesville Road, State Road 37, to Allisonville, approximately five miles beyond Indianapolis city limits. Turn right (east) on to Eighty-second Street, now State Road 534, at Allisonville, sign on corner, and proceed on East through Castleton to the Nursery.

A third route is to drive out College Avenue, Pennsylvania Street or Road 31 to Eighty-sixth Street, then turn East on 86th Street to Nora, here take State Road 534 on East through Castleton, to the Nursery.

For your convenience, we are operating a second sales ground at our Branch Nursery, which is located on the Noblesville Road, State Road No. 37, just north of Forty-sixth Street. Here you will find personnel and equipment capable of filling small retail orders quickly and efficiently.

Address all communication to The Hillsdale Landscape Company, R. R. 13, Box 158, Indianapolis 44, Indiana.

To Our Clients and Friends

With this seventh catalog, it is our privilege to enter upon our twenty-ninth year of business. We have served many of our clients the greater part of that time, others only more recently. To each we want to express our most heartfelt thanks and the hope that we may continue to serve in the future.

To new and old clients we offer honesty of value and sincerity of purpose.

The twenty-nine years of our business life have been through the years of the greatest progress of the nursery industry, and we have made every effort to keep abreast with it. Each new year has found us determined to serve you better than in the year past. We have adopted improved methods of growing, propagating and handling as they were developed, and proven. Likewise, we have made use of every new development of mechanical equipment that would widen our field of service, or give us more efficiency and economy in bringing our products to you. And, to all these efforts we promise to continue to subscribe.

In the presentation of our catalog, it is our aim not only give you a price list of the plants we grow, but a short description of them, pictures of various gardens to give you ideas for their use, and list of plans adaptable for certain uses.

Now, with best wishes for happiness and joy in your garden, and the hope that we may serve you for many years to come, we beg to remain.

Sincerely yours,

THE HILLSDALE LANDSCAPE COMPANY

LANDSCAPE SERVICE DEPARTMENT

To our many customers and friends

During the war years we have not always been able to give the same uninterrupted service which we were able to give during normal times. Now, with the war over and victory won we can again put our whole effort and strength to our business of serving you in accordance with our past high standards of reputation.

The members of our landscape service department are thoroughly trained and experienced in all phases of landscape construction, planting, and service. And their equipment is the newest and most modern machinery available. The methods outlined in the various paragraphs throughout the catalog are those used by our men and are those ways which we have found to result in the highest quality work.

Bring Your Landscape Problems to Us

Naturalized stream on a Williams Creek estate. Designed and executed by the Hillsdale Landscape Department.

LANDSCAPE DESIGN DEPARTMENT

We maintain a thoroughly trained Landscape Organization whose members are years of study and invaluable practical experience, have attained rare skill in the designing and planting of gardens, both large and small, of unusual beauty and merit. We want all of our customers to realize that we consider no job too small nor too large to command our best efforts and finest skill.

Without charge or obligation we will have one of our experts visit your grounds. He can give you an estimate of the small charge for preparing your plan. This plan will include a list of the proper plant required to produce the effects you desire. Also, period of years. It will show the proper location of the house, drives, walks, pools, benches, pergolas, terraces and of every plant. The value of such a plan must be apparent to everyone.

BETTER ROSES FROM HILLSDALE

ROSES "The Queen of Flowers"

Throughout many centuries the Rose has been rightly regarded as the "Queen of Flowers." This feeling is entirely justified as, indeed, there is scarcely any other flowering plant which, in return for so little money and effort, can return such an abundance of beauty and charm over such a long season.

CULTURE—We cannot go into the details of Rose culture here, but upon request by telephone, mail, or in person, we shall be pleased to furnish our many customers and friends with our "Rose Culture" pamphlet which thoroughly explains the method of planting our potted Roses, and how to prune and care for them in general.

All of our Roses are strong, budded, two-year-old, field-grown plants. They are A No. 1 grade plants, the best grade available on the horticultural market today. Being field grown, the plants have developed in a natural way and are of far superior strength and vitality than stock which has been developed into full growth under glass.

All Roses offered here have been tried and tested at our nurseries before offering them to you. We have found them to be of excellent quality and completely satisfactory in every way.

All Our Roses Are Planted in These Containers
and a Healthy Growing Condition

HILLSDALE PLANTED ROSES

Already Planted and Started for You

Undoubtedly the greatest innovation ever offered the rose buyer is the invention of the rose pot which enables us to offer our roses already growing and blooming.

This new and modern way of selling roses eliminates all danger of the plants not starting after being re-planted in your garden, and insures the buyer of exactly the rose desired.

These roses are growing in pots filled with a specially prepared soil and heavily fertilized to insure rapid and permanent growth and bloom. Hillsdale roses can be planted in your garden any time during the growing season, Spring, Summer or Fall, without showing even the slightest wilt to foliage, buds or blooms.

DIRECTIONS FOR REPLANTING POTTED ROSES

The re-planting of Hillsdale potted roses is very simple indeed. The pots are slit and carefully peeled off from the soil. The ball of soil is then set in the bed so that the soil level in the pots comes about one-half inch lower than the finished level of the soil in the beds. Always press the soil firmly around the roots of any kind of plant. This is done to force the air-space out of the soil around the roots. After this a general watering to thoroughly soak the soil down to the bottom roots is all that is necessary.

For those who can plant their roses early—we are offering dormant Plants at a reduced rate. These dormant plants are of the same grade and quality stock as our Potted Roses. They will grow and bloom as good if planted early. They should be all in the ground before April 15th After April 15th only our famous Potted Plants will be available.

DIRECTIONS FOR REPLANTING DORMANT ROSES

After the bed has been worked fine, each bush should be located and a hole dug large enough to accomodate the roots and deep enough that the crown, or bud, be one inch below the soil surface. After all the plants have been set, the bed is carefully and thoroughly watered.

Roses From Hillsade Are Always the Best

BETTER ROSES FROM HILLSDALE

Watering is most important and the failure to do so properly is responsible for many failures with Roses. Remember the roots are twelve to eighteen inches below the soil surface, and it takes lots of water to soak the ground to that depth.

We have found that in planting Dormant Roses, a protective covering over the canes for 10 days to 2 weeks is very beneficial. The drying action of the sun and wind is thus prevented until the root action starts, when the covering is removed, and full exposure to light and air is given. Burlap sacks, split, or canvas are good for this purpose, or the soil may be hilled up around them.

OUR ROSE-GARDEN WHERE YOU CAN SELECT YOUR PLANTS

ROSES—HYBRID TEA

There are thousands of varieties of them including all that can be desired in form, color and fragrance. There is not a single purpose demanded of the rose which the Hybrid Tea cannot fill. They are equally at home in the informal border or the beds of a formal garden, and wherever they are one receives a full season of exhibition sized blooms. The Hybrid Tea is certainly unsurpassed as a cut flower for house decoration or for the buttonhole.

The varieties we offer have been carefully chosen as those best representing the Hybrid Tea Roses, and most adaptable to our weather conditions.

All Roses in this list, \$1.35 each for potted plants, \$1.10 each for dormant plants, except where priced otherwise.

All varieties marked with an asterisk (*) are also available in dormant plants.

Quantity prices on dormant and potted Roses

	Per Doz.	
All \$1.10 Roses	\$12.10	
All \$1.35 Roses	\$14.85

Please Note

All prices quoted are for plants at our Nursery. An extra charge for the labor will be made when we do the planting.

Out-of-town orders which must be crated and sent by express, are accepted only when order is for 6 plants or more. An extra charge of 25 cts. per plant will be made for crating.

Hillsdale Everblooming Hybrid Tea Roses

Modern Hybrid Tea Roses represent the height of the hybridizer's art. They are among the most popular flowers in the world, for both garden decoration and cutting. The blooms range from single to very double forms, through all the shades of pink, red, orange, and yellow, and in so many combinations of these shades that one gardener cannot possibly be acquainted with them all. They deserve a special place in every home garden, whether it be informal or formal in type, and will reward the grower with glorious fragrant blooms all summer long.

ORIENTAL CHEERIES

Only those who have visited Washington, D. C., during the Spring months—who have seen the famous planting along the Potomac—can realize the fairyland of beauty presented by hundred of these Cherries in full flower. No words can do justice to such a sight—its splendor literally takes one's breath away.

A rich, open soil and sunny position are, of course, desirable, but so long as the drainage is good and there is a sufficiency of moisture at the roots they will grow almost anywhere.

MALUS—THE FLOWERING CRAB

The flowering crabs have few rivals among gorgeous spring flowering trees and shrubs. They are of easy culture, and whether planted singly or in masses, given remarkable and quick results. We are specializing in growing semi-matured specimens. Unlike the usual run of stock offered, these are all trained into fine specimens for immediate effect.

PLANT LARGE TREES—SAVE 10 to 25 YEARS OF WAITING

Our Automotive Mover

We are now able to offer the use of one of the largest types of automotive tree movers available today. With this modern machine we can successfully transplant mature trees up to twelve inches in diameter in the most efficient manner.

The prices quoted here include moving with a large ball of earth, planting, guying, staking, and wrapping. They are, however, subject to deviation dependent upon conditions at point of locations.

GRAFTED PLANT SPECIALTIES

Each year there are many plant novelties introduced into the horticultural world. Of special interest and unusual merit are these species of plants, grafted on tall single stems. There, several feet above the ground, the variety develops into a plant of its unusual characteristics. Hence there is little need to say that these specialties are unique.

HARDY HERBACEOUS OR PERENNIAL PLANTS

By this term is meant such plants as may be allowed to remain permanently in the open ground, whose foliage dies down to or near the ground each autumn, coming forth again with renewed vigor the following spring, giving a continuation of bloom from early spring until frost. All our plants are field grown and are many times larger than seed bed plants.

We are constantly searching for and adding new and rare varieties of merit to our extensive collection.

50 cents each, 3 for \$1.25, except where otherwise noted; \$4.00 per dozen

FOR YOUR HOME GARDENS

During the Spring months we grow a lot of vegetable plants such as Tomatoes, Sweet Potatoes, Cabbage, Peppers, and others. These plants are ready for you from May to June. Also have a complete variety of Annuals such as Petunias, Asters, Zinnias, and many others.

We will assist you in growing fruits for your table and flowers for your home and garden enjoyment. There is no better tonic for strained nerves than gardening. Working in shrubs and flowers as well as vegetables and fruits is a great pleasure.

GRASS SEED—INSECTICIDES—SPRAY MATERIALS

It is very important in buying grass seed to know that the seed you are getting is a blend adopted to central Indiana. The mixtures we offer are the result of our years of experience, and contain only those grasses which will give thick, enduring lawn.

Each variety of seed in these blends is the cleanest, and heaviest grade available. We invite you to use this seed and feel confident that you will be very pleased with the result.

Reseeding old lawns, use 2 to 3 pounds per 1,000 sq. ft.

Making new lawns, use 6 pounds per 1,000 sq. ft.

LAWN MAKING

To make a good lawn, that will last requires work. In making a new lawn or in remaking an old one, the soil should be loosened and pulverized thoroughly to a depth of 10 inches, and manure or peat moss and fertilizer mixed thoroughly with it. Then, after the soil has been thoroughly loosened and regraded, a good seed mixture should be sown evenly at the rate of 6 lbs. per 1,000 sq. ft. After sowing the seed, lightly rake, and roll and water. Do not allow the soil to become dry once the seed has started to germinate.

We recommend a complete fertilizer high in phosphorous for new or remade lawns. For established lawns, reseed in early spring or early autumn with a good seed mixture at the rate of 2 or 3lbs. per 1,000 sq. ft., topdress lightly with a good clean topsoil and fertilize with a complete fertilizer high in nitrogen. This treatment will greatly discourage weed growth.

If sod is to be used in place of seed, the soil should be prepared as outlined above and then the sod laid, tamped, rolled and watered.

SPRAYING

In order to keep your plants healthful and vigorous they need careful periodic examination for insect and disease attacks. During the growing seasons, inspection should be made for leaf-eating, and sucking insects, and fungous diseases. These are cured usually by spraying with arsenate of lead, nicotine spray or dusting with sulfur for the disease in the order named. For the two principal insects attacking evergreens, use arsenate of lead spray against bagworms, and sulfur dust against red spider.

When the trees and shrubs are dormant, an inspection should be made for scale. These are tiny hard-shelled mites which attach themselves to the bark of various kinds of trees and shrubs and suck the vital life-giving sap from the plant. They are controlled by a dormant oil or lime sulfur spray.

We have the most modern type of power spray equipment which develops a very high pressure and is capable of throwing a mist-like spray to the very top of a full grown shade tree, and yet is so easily controlled that it may be used on the most delicate shrub. This equipment with experienced operators is available to you for a very small charge per actual gallons of spray used.

THE HILLSDALE GARDEN SHOP

Sales Office at 46th and Allisonville Road.

On our branch nursery at 46th Street and the Allisonville Road (State Road 13), we have recently built and put into operation a Garden Shop for small retail sales. The service we intend to render here is to supply the lesser needs at a location convenient to the city.

Here you will find on display a full assortment of potted and perennials, annuals (in season) and small shrubs, evergreens and trees. In fact, all plants of a small size that you may select and conveniently carry away in your car. All material is displayed in a modern compact way that may be inspected with a minimum of effort.

There is also a wide selection of packaged spray material, fertilizer, grass, flower, and vegetable seeds, and pottery novelties, plus a full selection of garden ornaments and pottery including many styles of bird baths, sundials, gazing globes, benches, urns, and vases.

You are cordially invited to visit our modern Garden Shop and see the completeness and ease with which your garden needs may be filled.

DIRECTIONS FOR ORDERING

Write plainly and give explicit direction as to address and mode of shipment. Shipments will be forwarded exactly as directed but where we are without instructions, we will use our best judgment. All our products are shipped at the purchaser's risk. Any claims for damages should be made promptly to the transportation company's agent at the point of delivery. All goods are carefully packed.

We accept all orders on condition that they shall be void should injury befall them from frost, hail, fire, or causes beyond our control.

TERMS

Prices in this list cancel all previous lists and quotations. Customers unknown to us will please send cash or references with orders. Accounts are due when bills are rendered and prompt payments are expected. Prices given in this list are f. o. b. Castleton, Ind. Higher prices will be charged for specimens of higher quality selected by the customer or his representative.

Lots of 5, 50 and 500 trees or plants will be charged for at 10, 100 and 1,000 rate. These prices include packing costs, except on excessively bulky pieces, for which cost of packing will be extra.

GUARANTEE AND CLAIMS

All goods are guaranteed true to name, up to grade, full count, and in good condition when they leave our nurseries. We use the greatest care to have all our trees and plants true to name and will replace any that prove untrue to refund purchase price.

Due to the perishable nature of Nursery Stock and due to the fact that we have no control over the treatment and care of Nursery Stock after leaving our hands.

We give no Warrantly expressed or implied as to growth or productiveness of the Nursery Stock that we sell.

Plants are living organisms and their success depends upon the care you give them.

REPLACEMENT GUARANTEE FOR STOCK WE PLANT

All plant material, except perennials and roses, furnished and planted by us, which fails to survive within sixty days from date of planting will be replaced once without cost. Dormant plants must leaf out the following spring and continue in growth until June 15th. Plants failing to survive after the sixty day period, but within one year from date of planting will be replaced once on one-half the original planted price.
